USING GITHUB FOR TEAM PROJECTS

PSU Bootcamp on Reproducible Research

OVERVIEW

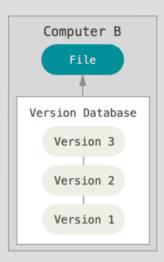

- Why do we need GitHub?
- GitHub Website Overview
- Understanding Open Source Contribution
- Using GitHub Desktop
 - Creating a repo, tracking files and committing to GitHub
 - Resolving conflicts
- GitHub pages (bonus)
 - Personal Website vs Project Website

WHY DO WE NEED GITHUB?

Alice's Computer

Computer A File Version Database Version 3 Version 2 Version 1

Bob's Computer

Alice and Bob are working on a team project for their Bioinformatics class

They decided to use Git to track changes on their computers.

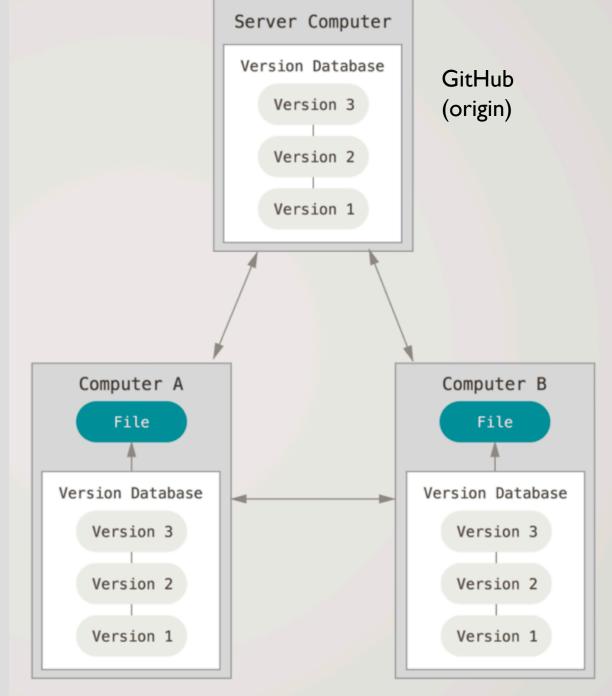

Some challenges in team projects:

- Trouble keeping their local copies in sync with each other.
- Tracking who is working on which part of the project
- Review each other's code and discuss improvements.
- How can anyone use the tool, availability, usage?
- Handle Bug fixes & Add new features
- Track contributions from scientific community

Distributed Version Control System

https://git-scm.com/book/en/v2/Getting-Started-About-Version-Control

Alice's Computer

Bob's Computer

GITHUB WEBSITE OVERVIEW

https://github.com/

OPEN SOURCE CONTRIBUTION

- Creating Issues
 - https://guides.github.com/features/issues/
- Forking a project
 - Creating a copy of the repo that allows you to contribute
- Understanding the GitHub flow
 - https://guides.github.com/introduction/flow/

DEMO: USING THE GITHUB FLOW

https://github.com/PrashantKuntala/psubootcamp2019

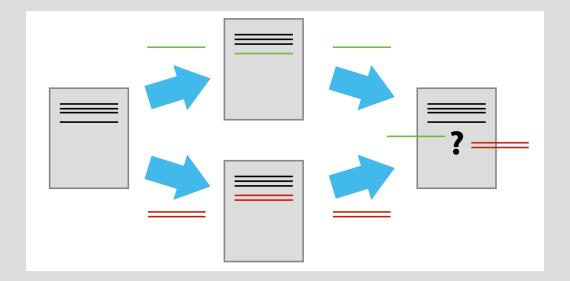

GITHUB-DESKTOP

https://desktop.github.com/

Installation and Demo

GIT CONFLICTS

• http://swcarpentry.github.io/git-novice/09-conflict/index.html

Deciding which changes to keep, when contributors make similar changes.

RESOURCES TO LEARN GIT
